THE WIRELESS NETWORKS
ON RIVER CAMPUS

UR_Connected
- Highest level of security (WPA2) | Requires a single login
- Does not disconnect as you move around campus

UR_RC_InternalSecure
- Lesser level of security than UR_Connected | Login required upon disconnect
- May disconnect as you move around campus

UR_RC_Guest
- Lower level of security | No Login Required
- Should only be used by visitors or individuals not affiliated with the University

The Residential Network (ResNet)

is the 1 Gigabit wired connection per port within the River Campus and Eastman residence halls

Requirements

Device must have an ethernet port (a USB ethernet will also work)	Devices must be registered prior to gaining Internet access	Routers (with wireless radios disabled) are allowed and preferred over switches
