

Chrome Browser Settings for Use with OnBase

To enable your Local Area Network (LAN) Flag in the Chrome Browser, do the following:

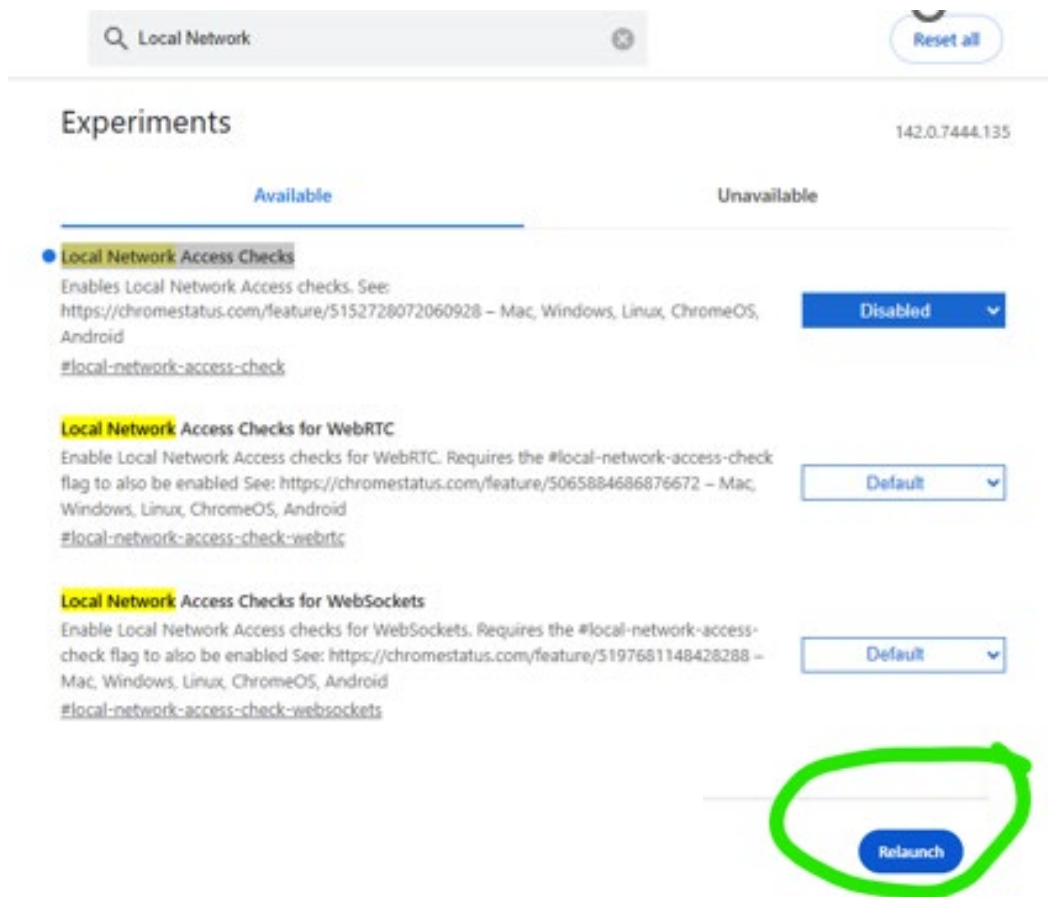

1. Connect to VPN.
2. To get to Chrome flags, open your Chrome browser, type **chrome://flags** into the address bar, and press Enter.

3. In the Search Bar for Flags Enter “**Local Network**” and Change the drop-down for **Local Network Access Checks** to “**Disabled.**”

4. Select the **Relaunch** button at the bottom-left of the screen.

5. OASIS users may be prompted to enter credentials in which case they should reference the domain as shown below:

UR\tschmit2

URMC-SH\tschmit2

Two side-by-side screenshots of a 'Sign in' dialog box. Both have the URL 'https://its-obweb-wp1.ur.rochester.edu'. The left screenshot shows the 'Username' field with 'UR\tschmit2' and an empty 'Password' field. The right screenshot shows the 'Username' field with 'URMC-SH\tschmit2' and an empty 'Password' field. Both have 'Sign in' and 'Cancel' buttons at the bottom.
